

DoloMatte™ Solid-Surface Shower Bases

The newest solid-surface solution. An American-made solid-surface slab is hand sanded into a velvety matte finish, thermoformed and then reinforced with a thick layer of fiberglass, wood, resin and titanium. The backing adds strength, structural integrity and increased insulation. The product is then hand finished.

Benefits include ...

Luxurious design aesthetics ◦ Exquisite matte finish ◦ Velvety-soft touch and feel

Hygienic non-porous surface ◦ One-piece slab construction for easy cleaning

Scratch and stain resistant ◦ High chemical and UV resistance

Material and color are consistent thru and thru ◦ Easily repairable

Organic design

Trench design

Available in multiple sizes

DoloMatte™ Solid-Surface Shower Bases

Technical Features

- Developed with Aristech Surfaces, a leader for over 50 years within the surfacing industry and manufacturer of the premium brand of solid-surface AVONITE®, a trusted brand known worldwide for over 30 years.
- The solid-surface slab is a patent-pending, highly engineered material that blends excellent thermoforming capabilities with the impenetrable high-end surface characteristics of solid-surface.
- A specialty polymer blended with ground minerals derived from Bauxite ore mixed with solid-surface resin.
- Far superior to cultured marble and most materials currently being used for shower bases.
- Consistent in color and property.
- Surface is non-porous, durable and impact/shock resistant; UV-, stain, mold- and mildew-resistant.
- Although difficult to scratch, scratches can easily be repaired with a fine grit sandpaper or Scotch-Brite® pad.
- Optional pre-leveled foam base available.
- Can be built using current MTI molds so many sizes and designs available.
- Custom sizes and molds are available upon request.

A mineral quarry
